Dreaming of A Playful Computer Engineer

학력

1997–2002	**Ph. D. of Computer Engineering**, *Seoul National University*.
1995–1997	**Masters of Computer Engineering**, *Seoul National University*.
1990–1995	**Bachelor of Computer Engineering**, *Seoul National University*.

박사 논문

제목	*Multipath Routing for Congested Networks*
지도교수	Professor Yanghee Choi
요약	This thesis explored the idea that congestion in the network can be mitigated through traffic splitting with multipath routing.

경력

2003–현재 **Professor**, CHUNGNAM NATIONAL UNIVERSITY, Daejon.
Developed Internet traffic measurement and analysis methods based on the big data platform, Hadoop.

Detailed achievements:
- Packet, Netflow and BGP routing data analysis method in MapReduce
- IPGeolocation DB for Korean networks
- Privacy exposure analysis on the online used markets

2002–2003 **Visiting Scholar**, UNIVERSITY OF CALIFORNIA, DAVIS, California.
Achieved Internet traffic engineering in the IP over optical networks

컴퓨터 기술

중	PYTHON, C/C++, JAVA, HTML, LaTeX, Linux
상	Computer Network and Architect
